NOTE!

This catalogue, without doubt, lists the greatest variety of plant material offered by any nursery in Southern California. Besides the varieties contained in this catalogue we grow many other varieties in small quantities. Submit us your want lists of plants that are difficult to find — in all probability we can supply them.

Ten acres devoted entirely to the growing and marketing of good plants. We are growers — not brokers.

We guarantee plants purchased from us to be true to name and will replace any found to be otherwise, but it is mutually understood and agreed between the purchasers and ourselves that we will at no time be liable for an amount in excess of the original purchase price.

Stock from our nursery, for use in Los Angeles County, does not require inspection at destination.

Prices subject to change without notice.

Some plants listed as 5 gal. are growing in egg cans, a container which holds approximately 3½ gallons.
